SUMMARY

Dedicated academic seeking an Assistant Professor position with an opportunity to pursue my interests in the field of PDEs applied to fluid mechanics systems, and/or in the interface between PDEs and the Artificial Intelligence field.

EXPERIENCE

Guest Researcher

Department of Mathematics, TU Kaiserslautern

📅 Sept 2022– Present 📍 Kaiserslautern, DE

- Studying the well-posedness issue of general compressible non-Newtonian fluid equations with the presence of vacuum at initial state.
- Regularity issue for a nonlinear elliptic system.

Research and Teaching Fellow

LJLL, Sorbonne University

📅 Sept 2021– Aug 2022 📍 Paris, FR

- Taught mathematics courses for first and second-academic-year students. Motivating students to achieve their potential.
- Working on research projects with applications to fluid dynamics problems. Co-operate with new people and perform applications using programming languages such as Python for instance.

Researcher

BICMR, Peking University

📅 Jan 2020 – Aug 2021 📍 Beijing, CH

- Working on a mathematical research project arising from fluid mechanics in collaboration with Prof. P. Zhang. This project has received funds from BOYA post-doctoral fellowship.

Research and Teaching Fellow

LJLL, Sorbonne University

📅 Jan 2019– Aug 2019 📍 Paris, FR

- Taught mathematics courses for first and second-academic-year students.

Researcher

ANGE, INRIA

📅 Sept 2017 – Dec 2018 📍 Paris, FR

- Working on a research project supervised by Jacques-Sainte Marie with an interest in the Tsunami problem.
- Taught introductory level courses in mathematics at Sorbonne University.

EDUCATION

PhD in applied mathematics

Lebanese University & Grenoble-Alpes University

📅 2013 – 2016 📍 Grenoble, FR – Beirut, LB

Title: On some heterogeneous models in fluid mechanics.

Advisors: Didier Bresch and Raafat Talhouk.

Master degree in mathematics

Lebanese University & Nantes University

STAY ABROAD

- Germany, Sept-Dec 2022: Stay at TU Kaiserslautern; invitation from Prof. A. Hussein.
- Lebanon, January 2020: Stay at Lebanese University; invitation from Prof. R. Talhouk.
- China, October-December 2019: Stay at BICMR; invitation from Prof P. Zhang.
- Germany, January 2019: Stay at Darmstadt University; invitation from Prof. M. Hieber.

TEACHING ACTIVITIES

Please consult my [Teaching Statement](#) for more details.

- List of courses taught at [SU](#)
 - Calculus I and Calculus II
 - Vectorial analysis and multiple integrals
 - Introduction to differential equations
- List of courses taught at [USMB](#)
 - Calculus I and Calculus II
 - Statistic
 - Linear Algebra
 - Probability
- List of courses taught at [LU](#)
 - Model and numerical method in geosciences
- List of courses taught at [ESILV](#)
 - Introduction to Statistics with R
 - Probability

SEMINAR TALKS

- Nov. 2019: Peking University, China.
- Jan. 2019: Darmstadt University, Germany.
- Nov. 2018: Aix-Marseille University, France.
- Mai 2018: University of Paris, France.
- Aug. 2016: Institute of Mathematics of the Czech Academy of Sciences, Czech Republic.

STRENGTHS

PDEs Compressible and incompressible fluids
Degenerate equations Elliptic regularity
Newtonian and non-Newtonian fluids

Python Machine Learning Data Science
DeepLearning Artificial Intelligence R

LANGUAGES

Arabic
French

📅 2011 – 2013

📍 Nantes, FR – Beirut, LB

Title: Hyperbolic boundary problems and numerical schemes.
Advisors: Jean-Francois Coulombel and Ayman Mourad.

Bachelor degree in mathematics

Lebanese University

📅 2008 – 2011

📍 Beirut, LB

PROJECTS

Here are some projects that I did as a part of my self-training in the Data Science and Artificial Intelligence fields. For a complete list, please consult my [GitHub-Page](#).

Data Science with Python(🔗, 2022)

The aim of this project is to fit a linear regression or a Ridge Regression model to predict the price using the list of features given on a dataset that contains house sale prices for King County.

Machine Learning with Python(🔗, 2022)

In this project, we use classification models such as K Nearest Neighbor(KNN), Decision Tree, Support Vector Machine, or Logistic Regression to determine whether a loan is paid off or in based on a dataset about past loans.

Car's generation detection(🔗, 2022)

The aim of this project is to predict the generation (I or II) of some unknown generation cars based on the features of each generation.

English

AWARDS

- Boya postdoctoral fellowship

Project title: Mathematical and numerical analysis for a class of non-Newtonian fluid dynamics equations.

REFEREES

Recommendation letters are available upon request.

Prof. Alain Miranville

🏠 University of Poitiers

✉ alain.miranville@math.univ-poitiers.fr

📍 Poitiers, FR.

Prof. Francisco Guillen-Gonzalez

🏠 University of Sevilla

✉ guillen@us.es

📍 Sevilla, ES.

Prof. Pingwen Zhang

🏠 Peking University

✉ pzhang@pku.edu.cn

📍 Beijing, CH.

Prof. Christophe Lacave

🏠 Grenoble-Alpes University

✉ christophe.lacave@univ-grenoble-alpes.fr

📍 Grenoble, FR.

CERTIFICATIONS

Here is a list of courses that I have accomplished on Coursera.

- What is Data Science (IBM|Online)
([Syllabus](#), [Certificate](#))
- Python for Data Science, AI & Development (IBM|Online)
([Syllabus](#), [Certificate](#))
- Data Science with Python (IBM|Online)
([Syllabus](#), [Certificate](#))
- Machine Learning with Python (IBM|Online)
([Syllabus](#), [Certificate](#)).
- Machine Learning Specialization (Stanford|Online)
([Syllabus](#), [Certificate](#))

RESPONSIBILITIES

- Co-supervisor: M2 Internship of Mme. C. El Hassanieh (Sorbonne University & Inria Paris and Lebanese University).
- Advance Competition: Participation in the jury of "Advance Concours" at EPITA.
- Part-Time-Teacher at ESILV.
