

# **BILAL AL TAKI**

## **R&D** in Data Science and Artificial Intelligence

Homepage in LinkedIn GitHub

immediately available

### **EDUCATION**

Ph.D. in Appl. Math. Grenoble-Alpes Univ. & Lebanese Univ.

**Title:** On some heterogeneous models in fluid mechanics.

Master degree in Appl. Math. Lebanese Univ. & Nantes Univ.

**2011 - 2013** 

FR, LB

**Title:** Stability of finite difference schemes for hyperbolic boundary value problems.

## **CERTIFICATIONS**

• What is Data Science|IBM.

(Syllabus, Certificate)

 Python for Data Science, AI & Development|IBM.

(Syllabus, Certificate)

• Data Science with Python|IBM.

(Syllabus, Certificate)

• Machine Learning with Python.

(Syllabus, Certificate)

 Machine Learning Specialization | Stanford.

(Syllabus, Certificate)

#### **STRENGTHS**

Data Visualization ) Python

Machine Learning Tensorflow

Deeplearning Latex Githu

SQL

## **RESPONSIBILITIES**

- Master Intership Co-Supervision of C. El Hassanieh at INRIA.
- Participation in the jury of "Advance Coucours" at EPITA.

## **LANGUAGES**

Arabic French English

### **HOBBIES**

- Basketball and Badminton
- An insight into Human behavior

#### **ABOUT ME**

Having a Ph.D. in applied mathematics, and being passionate about Artificial Intelligence and Machine Learning related subjects with good knowledge in this field, I am looking at joining a dynamic company and working on innovative projects for a promising future.

### **EXPERIENCE**

### Visiting Researcher | TU Kaiserslautern

Sept 2022-Present

- Kaiserslautern, DE
- Studying non-Newtonian fluids for medical and environmental applications.

### Research and Teaching Fellow | Sorbonne University

**Sept 2021- Aug 2022** 

- Paris, FR
- Teaching mathematics courses for first and second-academic-year students.
- · Establishing new mathematical results concerning problems related to Landslide phenomena.

### Researcher | Peking University

**i** Jan 2020 - Aug 2021

- Beijing, CN
- Developing new achievements to understand the shoreline problem in environmental problems.

## Research and Teaching Fellow | Sorbonne University

**i** Jan 2019 - Aug 2019

- Paris, FR
- Teaching mathematics courses for first and second-academic-year students.
- Collaborating with colleagues during the CEMRACS'19 conference to study the different numerical schemes devoted to the Compressible Navier-Stokes equations (used to model gas dynamics flow).

## Researcher | INRIA

**Sept 2017 - Dec 2018** 

- Paris, FR
- Teaching mathematics courses for Engineering students at Polytech Sorbonne.
- Developing new models to understand the Tsunami phenomena better.

#### **PROJECTS**

Here is a list of projects that I have done as a part of self-training on Data Science.

## Data Science with Python | • 2022

The aim of this project is to fit a linear regression or a Ridge Regression model to predict the price using the list of features given on a dataset that contains house sale prices for King County.

#### Machine Learning with Python | ? 2022

In this project, we use classification models such as K Nearest Neighbor(KNN), Decision Tree, Support Vector Machine, or Logistic Regression to determine whether a loan is paid off or in based on a dataset about past

### Car's generation detection | 😯 2022

The aim of this project is to predict the generation (I or II) of some unknown generation cars based on the features of each generation.

### **SKILLS**

- · Project management.
- Conducting research and publishing papers in academic journals.
- Development of artificial intelligence algorithms.
- Representing the university at conferences and delivering presentations when necessary.
- A peer reviewer of scientific manuscripts.
