EDUCATION

Ph.D. in Appl. Math.
Grenoble-Alpes Univ. & Lebanese Univ.

📅 2013 – 2016 📍 FR, LB

Title: On some heterogeneous models in fluid mechanics.

Master degree in Appl. Math.
Lebanese Univ. & Nantes Univ.

📅 2011 – 2013 📍 FR, LB

Title: Stability of finite difference schemes for hyperbolic boundary value problems.

CERTIFICATIONS

- What is Data Science|IBM.

    (Syllabus, Certificate)

- Python for Data Science, AI & Development|IBM.

    (Syllabus, Certificate)

- Data Science with Python|IBM.

    (Syllabus, Certificate)

- Machine Learning with Python|IBM.

    (Syllabus, Certificate)

- Machine Learning Specialization| Stanford.

    (Syllabus, Certificate)

STRENGTHS

| Data Visualization | Python | SQL |

| Machine Learning | Tensorflow |

| Deeplearning | Latex | Github |

RESPONSIBILITIES

- Master Intership Co-Supervision of C. El Hassanieh at INRIA.
- Participation in the jury of "Advance Coucours" at EPITA.

LANGUAGES

Arabic
French
English

HOBBIES

- Basketball and Badminton
- An insight into Human behavior

ABOUT ME

Having a Ph.D. in applied mathematics, and being passionate about Artificial Intelligence and Machine Learning related subjects with good knowledge in this field, I am looking at joining a dynamic company and working on innovative projects for a promising future.

EXPERIENCE

Visiting Researcher | TU Kaiserslautern

📅 Sept 2022–Present 📍 Kaiserslautern, DE

- Studying non-Newtonian fluids for medical and environmental applications.

Research and Teaching Fellow | Sorbonne University

📅 Sept 2021– Aug 2022 📍 Paris, FR

- Teaching mathematics courses for first and second-academic-year students.
- Establishing new mathematical results concerning problems related to Landslide phenomena.

Researcher | Peking University

📅 Jan 2020 – Aug 2021 📍 Beijing, CN

- Developing new achievements to understand the shoreline problem in environmental problems.

Research and Teaching Fellow | Sorbonne University

📅 Jan 2019– Aug 2019 📍 Paris, FR

- Teaching mathematics courses for first and second-academic-year students.
- Collaborating with colleagues during the CEMRACS'19 conference to study the different numerical schemes devoted to the Compressible Navier-Stokes equations (used to model gas dynamics flow).

Researcher | INRIA

📅 Sept 2017 – Dec 2018 📍 Paris, FR

- Teaching mathematics courses for Engineering students at Polytech Sorbonne.
- Developing new models to understand the Tsunami phenomena better.

PROJECTS

Here are some projects that I did as a part of my self-training in Data Science. Full list on my GitHub-Page.

Data Science with Python| 🐙 2022

The aim of this project is to fit a linear regression or a Ridge Regression model to predict the price using the list of features given on a dataset that contains house sale prices for King County.

Machine Learning with Python| 🐙 2022

In this project, we use classification models such as K Nearest Neighbor(KNN), Decision Tree, Support Vector Machine, or Logistic Regression to determine whether a loan is paid off or in based on a dataset about past loans.

Car's generation detection| 🐙 2022

The aim of this project is to predict the generation (I or II) of some unknown generation cars based on the features of each generation.

SKILLS

- Project management.
- Conducting research and publishing papers in academic journals (Google Scholar Profile).
- Development of artificial intelligence algorithms.
- Representing the universities at conferences and delivering presentations when necessary.
- Build and maintain a successful international collaboration across countries.
- A peer reviewer of scientific manuscripts.
